

Community information drop-in

Tidal flood risk management works on Canvey Island

We have now started work to renew and improve the erosion protection on the seaward face of the tidal defences, known as revetment. This will take place along a 3km stretch between Thorney Bay and the Island Yacht Club.

These works will help maintain the existing high level of tidal flood protection for thousands of homes and businesses, plus local infrastructure, on Canvey Island through to 2070.

Information drop-in: 25 May, 4-7pm

On 25 May 2023 we are holding an information event where you will have the opportunity to find out more about the scheme, and to ask the project team questions.

The drop-in will take place at the **Canvey Island Football Club, Park Lane, Canvey Island, SS8 7PX**. Please feel free to drop in anytime between **4pm-7pm**.
